Projects

- **Fake news detection**

Fake news on different platforms is spreading widely and is a matter of serious concern, as it causes social wars and permanent breakage of the bonds established among people. A lot of research is already going on focused on the classification of fake news.

- **Hotel Parking System**

Parking is often a time-consuming and expensive hassle, especially when traveling. In cities across the globe, hotel parking is an essential service provided by the hotel industry. Using hotel parking has become one of the most practical ways for individuals to save time and money.

- **Portfolio**

Created a personal portfolio website showcasing my projects, skills, and experiences. Emphasized clean design and intuitive navigation, with sections for project details, contact information, and downloadable CV to effectively highlight my professional accomplishments.

Progarmming Languages Known

C,Python,Java,Data Structures by Using C language,HTML,CSS,Java Script

Courses

B.Tech, Vignan University (7.5)
August 2020 - June 2024
